

Implementing Building Trades Multi-Craft Core Curriculum

This series is about implementing Building Trades Multi-Craft Core Curriculum (MC3), an apprenticeship readiness curriculum developed by North America's Building Trades Unions (NABTU). YouthBuild participants who successfully complete the MC3 receive an industry-recognized credential that can facilitate entry into registered apprenticeship programs sponsored by labor management organizations representing 14 crafts in the unionized construction industry.

The first webcast reviews the content and process of implementing the Curriculum at local YouthBuild programs. The second webcast describes the details of developing an implementation plan with local building trades councils affiliated with NABTU. The third webcast explains how the M3 online learning management system works. Curriculum content, as well as registration and credentialing platforms are available through the MC3 Learning Management System. The fourth and final webcast names a set of promising practices to initiate and sustain relationships with local building trades' councils. This is a critically important relationship that ensures pathways into registered apprenticeship.

[MC3 Webcast #1: Introduction to the Building Trades Multi-Craft Core Curriculum](#)

This webcast reviews the content and process of implementing the Curriculum at local YouthBuild programs. After this webcast, viewers will be able to describe the Building Trades Multi-Craft Core Curriculum (MC3); explain the purpose and benefits of the MC3 and discuss the steps involved in implementing a YouthBuild MC3 program.

[MC3 Webcast #2: Developing an MC3 Implementation Plan](#)

This webcast describes the details of developing an implementation plan with local building trades councils affiliated with NABTU. After this webcast, viewers will recognize the importance of developing an MC3 implementation plan, employ tools and effective practices towards developing an implementation plan and complete steps leading to NABTU approval.

[MC3 Webcast #3: Introduction to the MC3 Learning Management System](#)

This webcast explains how to gain access to the MC3 online Learning Management System. After this webcast, the viewer will be able to navigate the online learning management platform to find the unit learning objectives, Curriculum materials and register YouthBuild participants.

[MC3 Webcast #4: Sustaining Relationships with local building trades councils](#)

This webcast names a set of promising practices to initiate and sustain relationships with local building trades' councils. This is a critically important relationship that provides pathways into registered apprenticeship sponsored by labor management organizations. After this webcast, viewers will describe program practices to initiate and sustain relationships with building trades councils and discuss ways to involved building trades council representatives in ongoing program planning and development.
