Southwest Michigan Building Trades

**Subject: U1C28 Outage Successful Completion**

James:

The DC Cook Unit 1 outage successfully completed early this morning when the unit returned to the grid. We concluded this outage with zero recordable injuries, minimal rework, high quality, and low numbers of performance issues. In short, the collective membership from the various Halls performed in an outstanding and exemplarily fashion in support of our client, AEP.

I want to use this correspondence vehicle to personally compliment you, your council members, the Halls, our Site Reps, and the membership for the excellent display of skilled union professionalism that helped to produce this successful outage.

A large, stylized handwritten signature in black ink, which appears to be 'JK' with a long, sweeping underline that extends across the width of the page.
